

KanadShield Forensic Investigation

Official Evidence & Incident Report • Generated 2026-06-15 17:16:27

Case: Suspected C2 Exfiltration + DNS Tunnel — June 2026 Demo

Case ID: 0e5c5149-e57d-4eb3-8841-bb4d3a9cb792

Status: INVESTIGATING

Created At: 2026-06-15 17:11:14

Investigator Notes

Automated detection flagged DNS tunnelling (entropy 4.12) and port scan from 10.0.0.100. Recommend network block on src IP and forensic image of endpoint. External IP 203.0.113.10 is confirmed malicious (VirusTotal).
